Sugarfit: The Full-Stack Diabetes Platform

The Proof

75k current users

50% renewal

1.6 % HbA1c Drop

ARPU 19,990

The Challenge and Road Ahead

The opportunity

89.8 M

577 M

Internal Challenge: Scaling with current model

External Challenge: Global giants entering the market

The Human + AI Equation

How do we scale data-driven personalization while preserving the empathetic human coaching that patients trust?

Human Touch

Bandwidth and burnout: scarce clinician/coach time limits

Oversight burden: evaluate AI outputs amid automation bias and variable AI literacy.

Quality at scale: maintaining consistent, culturally attuned clinical care

AI Assistance

Nudge fatigue and over-reliance: excessive notifications and bias risk

Data and explainability: data gaps and the need for interpretable recommendations

Escalation: predictive nudges demand guardrails and timely escalation to avoid harm

The Next Phase for SugarFit

Basic Plan

AI-first ,monthly coach

Pro Plan

weekly coaching

Enhancements

community challenges
voice agent

Target audience for the next quarter

Focus resources on users with high engagement (> 75% plan adherence) but sub-optimal clinical outcomes (<1% HbA1c reduction).

- Highest Clinical ROI
- Lowest CAC

Unveiling Diabetes Management Strategies

North Star (Q4)

Medication
Freedom
Index

≥ 25%
reduction in
diabetes medication
intensity in 6
months

Metric with strongest
impact, easiest to
communicate and
understand

Positioning vs.
Apple/Google

- 1. Clinical depth
- 2. Human touch
- 3. Indian cultural fit

Expansion Opportunities

Metabolic Health Ecosystem

- PCOS Expansion : 45 million+ Indian women affected
- No CGM-driven PCOS management platform
- Same metabolic root cause, existing coach expertise

Geographic Strategy

- Phase I : Bangladesh, Sri Lanka (cultural similarity, 21 million+ diabetics)
- Phase II : Southeast Asia (Malaysia, Thailand - digital adoption)

Entry Strategy and Success Metrics

- Partner with local healthcare providers, adapt algorithms.
- 40%+ tier 2/3 penetration, local medical partnerships within 18 months.

Action

- Launch PCOS pilot program, establish SEA partnerships.

THANK YOU
