

Inbound Growth Beyond Founder Led Scale

A Systematic GTM Engine for zuddl

zuddl

Team Jugaad Labs

Ameya Panshikar | Srikar Pandrangi

Why this matters now?

Founder-driven growth has delivered strong results, but it does not scale with market expansion. As demand increases, founder bandwidth has become the primary constraint — creating a clear risk of growth plateau.

What we learned:

GTM messaging is misaligned across segments, causing conversion loss

AI-led discovery is becoming a primary vendor shortlisting channel, where Zuddl is underrepresented

Paid acquisition is inefficient due to generic creative and channel concentration

Our recommendation

Build a focused 3-pillar growth engine that addresses conversion, discovery, and efficiency simultaneously.

How is Zuddl positioned currently?

15% QoQ organic growth driven by organic & founder-led acquisition

Global event management software market growing at 10–17% CAGR

Demand exists, but acquisition does not scale with founder led growth

Key Takeaway: Growth is real, but the current model does not scale.

Zuddl has a Clear, Defensible Position in a Growing \$10B Market

Cvent (Legacy Incumbant)
Weakness: Complex onboarding & opaque pricing
Zuddl's Advantage: Unified platform with...

Airmeet (SMB Challenger)
Weakness: Weak enterprise compliance, Limited features
Zuddl's Advantage: Full enterprise feature...

Hopin (The Pivot)
Weakness: Declining market share, positioning confusion
Zuddl's Advantage: Clear differentiation and a strong growth strategy

Zuddl competes in the ~\$8–10B unified event orchestration segment. While Cvent and Airmeet are direct competitors, no one owns the transparent + unified + developer-friendly position. This is our ground to take and dominate.

Solving the 3 Core Issues

A Single GTM Message Is Actively Destroying Conversion

What's Happening

Zuddl uses a single “Unified Event Platform” message across all customer segments.

Different Buyer Segments Require Fundamentally Different Messages

Dimension	Enterprise	Commercial	Mid-Market
Decision Cycle	3-6 month	1-2 month	2-3 month
Primary Buyer	VP/Director	Marketing Manager	Senior Event Manager
Key Pain	ROI proof & risk	Speed & ease of use	Affordability & reliability
Messaging Focus	Strategic consolidation & compliance	Fast setup & intuitive UI	Best value & support
Proof Points	Fortune 500 case studies & SOC2	G2 reviews & speed demos	NPS scores & testimonials

Example: An Enterprise buyer searching for "consolidate event tools" sees our ad for "fast setup" and disengages, whereas a message about "consolidating 5-7 tools" would resonate.

Segment-Specific Messaging Is the Fastest Conversion Unlock

Develop 4-6 LinkedIn ad creatives per vertical
Test across accounts
(6-week A/B test)

Implement a 3 stage Sequential
Messaging Framework to
nurture leads from Awareness
to decision

Awareness: Problem-focused marketing

Consideration: Solution-focused marketing

Decision: Proof-focused marketing

Create different versions of landing pages targeting a specific segments

Paid Channel Inefficiency

The Core Problem

Our paid strategy is constrained by generic messaging and a narrow channel focus. We are not tailoring creative to segments or leveraging our most efficient channels.

Current Channels(Linkedin)

ROAS: 1.1-1.3x

B2B Benchmark: 2.5-3.0x

Budget Allocation: 35-40% of paid spend.

The Opportunity

A systematic, multi-channel testing approach can reduce our blended CAC significantly within 6 months.

Optimize Paid via Testing & Repurposing

Paid test Matrix

Channel	Creative	Targeting Strategy	Core Offer	Hook / Messaging	Primary KPI
Reddit Ads	Text Ads (Native)	Subreddits: r/SaaS, r/startups, r/marketing	Self-Serve Free Trial / 'Startup Plan'	Look like a billion-dollar company on a startup budget.	Sign-ups < \$100 CPA
Google Search	Search Text	Keywords: affordable webinar platform, zoom alternative for webinars	Comparison Guide (Zuddl vs Zoom)	Stop using Zoom for serious webinars.	CTR > 3%, Conv. Rate > 5%
LinkedIn	Sponsored Content (Single Image)	Job Titles: Demand Gen Manager, Event Manager (200–1000 employees)	Webinar: 'Pipeline from Events'	Stop guessing your event ROI. Sync to HubSpot in 1 click.	MQL < \$150 CPA
G2 / Capterra	Category Sponsored	Intent: Event Management Software	Demo Request	Rated #1 for Ease of Setup.	Demo Req < \$200 CPA
LinkedIn	Conversation Ads (InMail)	ABM List: Fortune 2000 Marketing VPs / CMOs	Consultation / Custom Audit	Consolidate your 7 event tools into one secure hub.	Meeting booked rate > 5%
YouTube	TrueView (Pre-roll)	Retargeting: Visited Pricing / Enterprise Page	Case Study Video (Microsoft / UN)	See how clients saved 40% on event ops.	View-through Conv. & Brand Lift

Content Atomization & Repurposing

Strategic Roadmap For Inbound Growth

Phase 1

Ignite & Test

Months 0-2

Launch 3 vertical specific landing page variants to address a particular pain point for top 3 industries

Implement a parmonic workflow for large videos & publish more value-led posts than feature-led.

Start implementing the paid test matrix

Phase 2

Build & Personalize

Months 2 to 4

Create hubs for use case specific groups(Sponsor analytics, ROI,Consolidation etc)

Increase the video publishing Frequency on YT to 8 videos per month on high-intent & niche topics

Double down on the top creatives that are working

Phase 3

Scale & Predict

Months 4 to 6

Perfect the Multi-Channel Content Workflow (Parmonic at 100% Capacity)

Allocate budget only to highly effective channels and boost content

Output: 8-10 posts/week across channels. Offsite Impact: Higher community presence → UGC backlinks → AEO citations

AI Is the New Discovery Layer (And We're Losing)

Shift in Buyer Behavior

Buyers increasingly use AI tools (ChatGPT, Perplexity) for early-stage vendor discovery.

Share of AI Answer Citations:

For relevant event management queries, competitors are cited 5-10x more often than Zuddl in AI Answer Engines (ChatGPT, Perplexity).

Evidence on AEO performance

LLM web search Analysis: Our content is only mentioned in 5-10% of relevant LLM responses.

High-Intent Blind Spot: Zuddl does not appear on page 1 for crucial long-tail queries like "best enterprise event platform" or "SOC2 compliant event platform".

Content Gaps: Our existing blog content lacks the FAQ/How To Schema and internal linking structure that Answer Engines favour.

Why It Matters Now

The Shift is Happening: Buyers are increasingly using AI for initial product research.

A Closing Window: We have an estimated 8-12 week window to establish a foothold and gain an early-mover advantage before this channel becomes saturated and competitive.

Current performance of Zuddl on AEO and SEO

Query	Who Shows Up Prominently	Zuddl Presence	Takeaway
"best enterprise event platform"	Livestorm blog ranking platforms like Zoom Events, ON24, Airmeet, Whova, etc.	Zuddl does not appear on page 1 as a recommended provider	Aggregators and competitors own the "best X platform" narrative; Zuddl absent from discovery content.
"Zuddl vs Cvent"	Zuddl's own compare page ranks (zuddl.com/compare/cvent) ; 3rd-party comparisons (Crozdesk) also appear	Strong owned asset present	This is a goodControl/Testcandidate for AEO experiments and internal linking.
"event ROI attribution"	Zuddl has glossary and ROI metrics content (analytics & ROI glossary; post-event ROI metrics blog)	Zuddl content exists but not clearly dominating rich snippets	Strong base content; can be restructured into Q&A and schema for AEO.
"SOC2 compliant event platform"	Results dominated by Sched, eventPower and other competitors who explicitly market SOC2 compliance	No visible Zuddl-specific SOC2 article in top results	Clearcontent gapfor a high-trust, enterprise-critical topic.
"event platform with Salesforce integration"	Multiple event tools (EventsAir, Eventdex, Fonteva, etc.) market Salesforce integrations heavily	Zuddl has strong integration pages for HubSpot & Entra and likely Salesforce, but not clearly leading this query	Zuddl should explicitly target "Salesforce/HubSpot-integrated event platform" with comparison guides & AEO pages.

- Zuddl performs well on branded/comparison queries (e.g., "Zuddl vs Cvent")
- Zuddl has strong analytics/ROI content, but not yet optimized for Q&A/snippet-heavy queries
- High-intent "best platform", compliance, and integration queries are dominated by others
- Zuddl currently has no visible FAQ/HowTo rich results or dominant LLM-style answer snippets in the SERP checks done

Winning AI and Community Discovery Captures Demand Earlier

Winning the AI Visibility Gap (AEO)

Zuddl's content is not structured for AI crawlers (missing schema, Q&A format)

- 1. Create AEO Content:** Publish 10-15 new page blogs specifically formatted to answer high-intent questions ("Zuddl vs Cvent", "How to prove event ROI", "SOC2 compliant platforms")
- 2. Implement Schema:** Add FAQ and HowTo schema markup to all relevant new and existing content.
- 3. Track and Optimize:** Deploy a custom LLM tracker to measure the increase in our citation rate from its 5-10% baseline.

Goal: Achieve a 35-40% citation rate within 6 months

Growing presence on User Generated Content Platforms

Zero systematic presence on platforms where buyers ask for peer recommendations

- 1. Reddit:** Answer relevant questions about event management without spamming to index on LLMs and consequently rank on LLM searches.
- 2. Quora:** Answering relevant queries in a Q&A format through authentic accounts.
- 3. G2, ProductHunt:** G2 reviews are ranked higher on LLMs for queries specific to B2B Tech product search queries

Goal: Generate 5-10 high quality low CAC inbound leads per month from these channels.

Primary metrics (Growth-oriented)

Primary metrics are the ones that directly impact your company's bottom line. They reflect how successfully your event drove tangible business results, including attendance, pipeline, and revenue impact.

Event analytics

This category buckets the most essential, event-specific metrics, including:

#1 Total registrations: The total number of registrations your event received. This helps measure the overall interest in your event and brand and gauge the effectiveness of your promotional activities.

Related: 5 Smart (& Budget-Friendly) Ideas To Promote Your Upcoming Event

#2 Attendance and turnout percentage: The total number of attendees and the percentage of those who attended the event versus those who registered.

Deliver your best event ever with Zuddl

Secondary metrics (Brand and engagement-oriented)

Content analytics

[Bonus] Event analytics (For ticketed events)

Category 1: OneLink.to Basics

1. What is OneLink.to?

OneLink.to is a web-based smart link and QR code service that routes users to the correct app store (Apple App Store, Google Play, etc.) based on their device. Launched in 2011, it solves the "multiple links problem"—instead of separate links for iOS and Android, you create one universal link that works everywhere. Desktop users get redirected to a fallback URL (usually your website). It's lightweight, easy to set up, and requires no SDK integration. However, OneLink.to is **not an attribution platform**—it can't measure which campaigns drive installs, conversions, or revenue.

2. Who created OneLink.to and when was it launched?

OneLink.to was **launched in 2011** as an independent smart link service focused on simplifying app distribution. It positions itself as a solution for marketers who need one link (or QR code) to replace multiple platform-specific URLs. Unlike mobile measurement partners (MMPs) such as Linkrunner, AppsFlyer, or Branch, OneLink.to focuses exclusively on **device routing and link shortening**—it doesn't provide attribution, deep linking, or campaign analytics. The service has remained relatively lightweight and developer-friendly over the years.

...

Best alternative to Cvent for a smaller market?

I work for an event management company based in Mongolia and we host about 5 mostly b2b trade shows/expos a year. We really need event management software that has the following features:

- Online/in-person registration with on site badge printing
- The ability for exhibitors to book meetings with each other
- Registration for up to 7000 visitors, 200 exhibitor companies
- Event info (venue map, speakers, sponsors etc.)
- Multiple events a year

We have looked into Cvent but the pricing is untenable for us due to their per registration pricing. What other software offers similar functionalities but at a lower price or with a different pricing structure?

...

Best comprehensive platform for a webinar

Question

Asking for some advice here.... I have an upcoming webinar of several hundred people and am thinking it makes sense to use LinkedIn live. Is there a vendor that combines landing page for registration along with email notifications and reminders?

AEO Playbook

Onsite AEO (Building a Foundation on Zuddl.com)

Content Restructuring

Long form blogs → Q&A formatted webpage

<https://linkrunner.io/blog/onelink-to-faq-hub-40-questions-answered-yes-even-for-llms>

Schema Markup Implementation

Help & Support pages should have internal backlinks for other pages in a LLM crawl friendly format

Information Architecture Consolidation

Subdomain to Subdirectory → 'docs.zuddl.com' to 'zuddl.com/help'.

Offsite AEO (Building Credibility Across the Web)

High-Impact YouTube Content

Create 3 new videos every week for 8 weeks consistently on niche topics to see results

Systematic Reddit & Quora Engagement

Authentically engage in 5-10 relevant threads per week to gain trust and positive engagement by answering niche queries

High-Authority Backlinks

Secure placements and mentions in top-tier publications (e.g., TechRadar, industry blogs). LLMs heavily weigh links from trusted sources.

Metrics to Measure AEO Success

	 Baseline (est.)	 Month 2	 Month 4	 Month 6
LLM citation rate	5–10%	20–25%	30–35%	35–45%
Avg. citation position	N/A	Top 4	Top 3	Top 2
AEO Test vs Control traffic	1.0×	1.2×	1.4×	1.5–1.6×
Demo requests from AEO pages	Minimal	5–10 / month	15–20 / month	30–40 / month

Citation Rate

% of tracked questions where Zuddl is mentioned by each LLM

Citation Position

Average rank of Zuddl among platforms cited

Share of Voice

Mentions of Zuddl vs Competitors

Traffic & Conversions

Demo Conversions

Strategic Roadmap For AEO

Phase 1

Ignite & Test

Months 0-2

Deploy N8N + Google Sheets AEO Tracker.

Launch 5 Test group vs control group webpages. Implement FAQ/How To schema markup

Subdomain to Subdirectory migration. docs.zuddl.com to zuddl.com/docs → LLM crawl friendly

Phase 2

Build & Personalize

Months 2 to 4

Scale AEO Pages to 15-20. Implement cross-linking hub/spoke: Make sure each AEO page has backlinks.

Subdomain-to-Subdirectory migration. Add FAQ schema to top 20 help articles

Launch YouTube Video Transcript for 20 videos per week for LLM Crawling

Phase 3

Scale & Predict

Months 4 to 6

Double Down on Top 5 AEO Pages (Citation Rate >30%). Build multiple backlinks per page and replicate to other test group

Implement Advanced Schema Markup Across 50 Pages.

Scale UGC for LLM Citation at 10-15 Posts/Week. Reddit: 5-7 posts/week in r/B2Bmarketing, r/saas, r/eventplanning

Final Recommendation

To scale beyond organic channels, zuddl must systematize inbound growth. This strategy aligns how customers buy with how Zuddl goes to market creating predictable, scalable growth.

THANK YOU
